

Create a Podcast: Part One-C

This Video briefly describes how to Create a Podcast for KCPK-LP radio. This is Part One-C.

We will discuss:

- How to describe your idea
- How to script a show

How to describe your idea

KCPK-LP requires that you submit a written summary of your podcast series. See the side-bar of this video for hyperlink under the copy of text document.

We want to know about your idea, your target audience, and the format of your podcast, such as: is it a solo show or co-hosted? Is it an interview or roundtable discussion? Or an educational documentary? Or an art form, such as a play, a reading, a creative commons musical production?

Your choices will impact the type of copyright releases which will be required for submission of the podcast to KCPK-LP for broadcasting.

How to script a show

If you want to follow a more structured and conventional format, please click on the “Template for Podcast scrip” at the hyperlink in the side-bar of the video.

KCPK does not require a specific script to be followed. Originality and creativity can develop new audience following.
